

Welcome to the 2021 Idaho Botanical Garden Plant sale! We are thrilled to be able to continue our tradition of Spring plant sales during these unusual times. Thank you for your generous support of this important fundraiser for the Idaho Botanical Garden Horticulture program. Revenue from the sale supports our professional horticulture staff, providing tools and materials for our gardens and greenhouses. We also thank you for your continued patience and understanding as we continue to improve our online sales system.

Plants for sale this year include Annuals, Vegetables and Herbs, Native Plants, Perennials, and a wide selection from the Plant Select® program. Please note that this list is not a guarantee that listed plants will be available. There may also be selections available in the online store that are not included here, and there may be some items listed here that will not be available in the final sale.
